# Introduction

Over the years the focus of education has remained the same, but how teachers impart knowledge to students is totally different from way back then.

The main areas of change are in the approaches, methods or techniques of teaching in education.

School was not as much of an occupation as it used to be back then, teachers today are a lot more lenient to students than they were 60 years ago and more so, education used to appear like a military camp but at present, it is a day camp.
